

ICan Talk Clinics of the

Meeting the needs of individuals with complex communication difficulties.

Our trained speech-language pathologists provide clinical services, training and support to those who need it most from infancy to adulthood.

We specialize in providing professional services to individuals who use **Augmentative and Alternative Communication (AAC)** systems.

Our patients include individuals with a range of disabilities. They include, but are not limited to:

- Amyotrophic Lateral Sclerosis
- Angelman's Syndrome
- Autism
- Cerebral Palsy
- Developmental Disabilities
- Parkinson's Disease, Huntington's Disease
- Progressive, degenerative disorders
- Stroke/Aphasia
- Traumatic Brain Injury

AAC Institute is a worldwide resource for:

- People with severe communication disorders or who cannot speak, their families and friends
- Professionals and Educators
- Researchers and Developers

What We Do

ICan Talk clinicians provide innovative, comprehensive, family and community-based services to meet the complex communication needs of individuals across the life span.

Services include:

- Speech-Language Evaluations
- Comprehensive AAC & Computer Access Evaluations
- Performance & Outcome Measurements
- Individual Treatment
- Group Treatment
- Speech Generating Device Funding Reports & Appeals (USA only)
- Trainings, Workshops & Webinars
- Advocacy
- Community Consultations
- Home Visits
- Family & Caregiver Support
- Tele-rehabilitation Services

Language Activity Monitoring (LAM) tools are routinely used by clinicians at the *ICAN Talk Clinics* to support your treatment. LAM tools allow users and families to track progress and success!

Read more about LAM on our Web site, www.aac institute.org.
